

INTISARI

Tujuan penelitian ini adalah untuk mengetahui pengaruh kinerja keuangan yang diukur dengan *Current Ratio*, *Debt to Equity Ratio*, *Return On Asset*, *Earning Per Share*, dan *Price Earning Ratio* terhadap harga saham pada perusahaan telekomunikasi di Bursa Efek Indonesia.

Metode Pengambilan sampel menggunakan metode *purposive sampling* dari enam perusahaan yang terdaftar di Bursa Efek Indonesia pada tahun 2010-2014, hanya lima perusahaan yang digunakan dalam sampel penelitian. Metode analisis data dengan menggunakan analisis regresi linier berganda.

Hasil pengujian menunjukkan bahwa model analisis regresi linier berganda yang digunakan dalam penelitian layak dan dapat dipergunakan pada analisis berikutnya. Hasil pengujian koefisien regresi secara parsial menunjukkan bahwa variabel *Current Ratio* tidak berpengaruh signifikan terhadap harga saham, *Debt to Equity Ratio* tidak berpengaruh signifikan terhadap harga saham, *Return On Asset* berpengaruh signifikan terhadap harga saham, *Earning Per Share* berpengaruh signifikan terhadap harga saham, dan *Price Earning Ratio* tidak berpengaruh terhadap harga saham.

Kata Kunci: *Current Ratio*, *Debt to Equity Ratio*, *Return On Asset*, *Earning Per Share*, *Price Earnings Ratio*.

ABSTRACT

The purpose of this research is to find out the influence of financial performance which is measured by using Current Ratio, Debt to Equity Ratio, Return On Asset, Earning Per Share, dan Price Earning Ratio to the stock price of telecommunication companies which are listed in Indonesia Stock Exchange.

The sample collection technique has been done by using purposive sampling method and the samples are 6 companies which are listed in Indonesia Stock Exchange in 2010-2014, and 5 of 6 companies have been used in the research sample. The data analysis method has been done by using multiple linear regression analysis.

The result of the test shows that the multiple linear regressions models that have been applied in this research are feasible and they can be used for the next analysis. The result of partial regression coefficient shows that current ratio variable does not have any significant influence to the stock price; debt to equity ratio does not have any significant influence to the stock price; return on asset has significant influence to the stock price; earning per share asset has significant influence to the stock price; and price earning ratio does not have any influence to the stock price.

Keywords: *Current Ratio, Debt to Equity Ratio, Return on Asset, Earning per Share, Price Earning Ratio.*
